

Differences in Variables between ELMPS 2023 xs v2.1 all and ELMPS 2023 xs v2.2 all:

- **For the wealth variables** [wealth, dwealth, qwealth, wlthurb, wlthrur, dlwthurb, dlwthrur, qwlthurb, qwlthrur], they have been revised to ensure consistency with previous rounds. The number of modified observations vary from 5,754 to 70,594.
- **For mother variables** [mtempst, mtirreg, mtoccup, mtocp1d, mtocp2d, mtocp3d, mtsectr], they have been revised to retrieve all mother-related variables. Check do file “ELMPS 2023 Parental characteristics v30” for revised version. The number of modified observations vary from 33 to 237.
- **For Formality variables** [crformal, crinstsec, usformal, usinstsec], the definition of formal workers was revised to include only workers with social security insurance, rather than using both social security insurance and contract type, with the number of modified observations vary from 489 to 954.
- **For job characteristics** [wexp, job*_14m, job*_16u, job*_09, job*_11, job*_15, job*_13, job*_16g, job*_16k, job*_16s], they have been revised to retrieve all jobs variables from job1 to job12 were considered instead of from job1 to job7. Also, check do file “ELMPS 2023 Jobs Status v23.do” for revised version from line 187 to 209. The number of modified observations ranging from 1 to 15903.
